Settle them in, the right way

Is there anything more exciting than bringing home a new puppy – we don't think so!

Which is why we want to help you give them the best start in life with our puppy pack. Designed with the all-important settling in period in mind, which is often full of change for pups, it's packed full of goodies to help you transition your little one into their new home.

All-round good health

Developed to provide whole-body benefits with its blend of seven herbs, **Keeper's Mix®**

Sensitive is an even gentler and milder flavoured version of our best-selling original Keeper's Mix supplement, and the perfect all-rounder for puppies! It's perfectly balanced to provide natural antioxidants (to neutralise free radicals), vitamins, minerals, chlorophyll, fibres and complex bioactive compounds while being especially gentle on the gut and other organs. Keeper's Mix Sensitive naturally promotes all-round health, by supporting vital organs and encouraging a thick and healthy coat - helping to get your pup off on the right foot.

Support for little tumms

Upset tummies can be common in puppies, with the stress of leaving their litter mates, adapting to their new home and often a change in diet to deal with. Our **Tree Barks Powder** contains three herbs that are renowned for their digestive health properties, to help support your little one when they need it most. Slippery elm bark, marshmallow root and white poplar bark work together to promote soothed and comfortable tummies, good regularity and normal stools. It can be used to help support your pup through a diet change, which we always recommend doing gradually.

Did someone say ball?

Yes, we did! We know puppies can't resist a ball so have included an exclusive Dorwest tennis ball, for fun games of fetch to help with bonding.

A clean start

Specially formulated for sensitive skin, our nourishing **Soothe & Calm Shampoo** is perfect for delicate puppy skin. With all-natural ingredients, it combines the soothing and hydrating powers of oatmeal, aloe vera and chamomile extract with the calming properties of lavender. pH neutral, with no artificial fragrances, SLS or other 'nasties', this hypoallergenic shampoo can help keep your pup's skin and coat in top condition. Make sure you have a non-slip mat if you're using your bath or shower, always check the water temperature, avoid getting water or shampoo in their eyes or ears and give them a gentle massage with the shampoo – these are our top-tips to make the experience enjoyable.

Their 5-a-day

OK, dogs don't need 5 a day, but they can still benefit from the goodness that vegetables have to offer. Our **Easy Green Powder** supplement has all the power of 'super-greens' in an easy-to-give powder. Just add to your pup's normal food for them to get all the benefits of eating a bowl of greens, without a spinach leaf in sight! The quick air-drying process retains maximum nutrients in a digestible form to naturally boost levels of iron, vitamin C, chlorophyll, calcium, magnesium and antioxidants (to neutralise free radicals) – ideal for supporting your puppy's all-round health.

The perfect measure

To make sure you're always giving the right amount of our supplements to your little one, our Puppy Pack comes with an exclusive Dorwest spoon. Just follow the administration instructions on the product pack, and be sure to get regular weigh-ins as your pup grows.

DORWEST.
SINCE
1948 [®]

We've been supporting the health of dogs and cats for over 75 years as a family-run business, now in its third generation, and are proud to be the UK's leading provider of canine and feline herbal supplements. Whether it's providing personalised, knowledgeable advice or ensuring quality, purity, sustainability, and traceability for all our ingredients, consistent quality, expertise and care is built into everything that we do.

Should you require further information on other leaflets in our range or require advice either:
